

**From Tom Burnett Sr:
A petition to stop the Flight 93 Memorial**

March 2008

Dear Fellow Americans:

The planned Flight 93 Memorial contains extensive Islamic symbolism. It is an insult to my son Tom, and to the other murdered heroes of Flight 93 who stopped Islamic terrorists from destroying the White House or the Capitol that terrible September day.

Please consider signing this online petition that I and some compatriots have put together. It calls for a new memorial design, and for investigation of the present design. If you want to do more, feel free to forward or post this appeal.

For those who are not familiar, the original “Crescent of Embrace” design was laid out in the crescent and star configuration of an Islamic flag:

Outrage over this overt Islamic symbolism forced the Memorial Project to disguise the original crescent with a few additional trees, but every particle of the original design remains completely intact in the so-called redesign. The giant crescent and star flag is still there!

The Memorial Project assumes that any similarity to an Islamic crescent has to be unintentional. Even if it WERE unintentional it would still be intolerable, but how can anyone look at that crescent and star configuration and think that it CAN'T be intentional? That is like seeing an airliner fly into the World Trade Center and thinking that it CAN'T be intentional. Worst of all, the Memorial Project refuses to confront voluminous evidence that the Islamic symbolism IS intentional.

It turns out that a person facing into the giant crescent will be facing Mecca. A crescent that Muslims face into to face Mecca is called a “mihrab” and is the central feature around which every mosque is built. The crescent memorial will be the world's largest mosque!

When TWO airplanes fly into the World Trade Center, even the most naïve person has start taking the possibility of intent seriously, but not the Memorial Project. The Islamic symbolism in Flight 93 Memorial goes on and on, but the Park Service refuses to be concerned.

Architect Paul Murdoch says that the crescent shape comes from the hijacked airplane breaking the circle where it crosses the upper crescent tip. The flight path then continues

down to between the crescent tips where Flight 93 crashed. (That's right: the crash site is the star on the crescent and star flag.)

Along the flight path are to be placed 44 translucent blocks, equaling the number of passengers, crew, AND terrorists:

Left image: The Memorial Wall, traces flight path just above the point of impact. The white line at eye level is a set of 43 glass blocks, 40 to be inscribed with the names of my son and the other passengers and crew, and three (on the near side of the gap) to be inscribed with 9/11 date. **Right image:** At the upper crescent tip, at the end of the Entry Portal Walkway, sits a huge glass block, the 44th glass block on the flight path. It marks the spot where, in the architect's description, the terrorists broke our humanitarian circle, turning it into a giant (Islamic shaped) crescent. Inscription: "A field of honor forever."

I don't want to celebrate the terrorist's circle-breaking crescent-creating feat, and I certainly don't want my son's name inscribed on that terrorist memorializing block count.

We need to get the word out: the Flight 93 Memorial has been re-hijacked, and this time the whole nation is aboard. We have to get up out of our seats and stop this abomination!

Sincerely,

Tom Burnett Sr.
